

3 PS TIPS WHEN BUYING TOYS

3PS

Product

Look carefully at the toy and its packaging.

Make sure the toy:

- does not have small parts, loose parts or elements that could come off;
- indicates who the company responsible for the product in the European Union is;
- bears the CE marking;
- the safety information in your language

Point of sale

Buy from trusted shops and websites.

This will make it easier to ask for help if any problem arises.

Keep the receipt or proof of purchase.

Price

Check the price.

If it seems suspiciously cheap, be cautious, it could be a counterfeit.

Safety

For the child's safety, always choose a toy suitable for the **recommended age group**. Follow the **safety warnings**; otherwise, you could be putting the child at risk.

If you buy online, check:

- who is the company responsible for the toy in the EU;
- how to contact the company (postal address and email);
- a clear image of the product;
- the recommended age;
- the safety information in your language.
